

Practice languages with dialogue and AI feedback.

LanguageTrain combines structured language practice with chat roleplays, vocabulary review, and learning notes for classroom use.

— WHAT LEARNERS PRACTICE

- Everyday, travel, school, work, and health conversations
- Personal vocabulary collections with review routines
- Gentle corrections and explanations in the learner's native language
- Notes, progress history, and next-step practice suggestions

— CLASSROOM ROUTINES

- Short language drills for regular review
- Dialogue scenarios for everyday, travel, school, and work
- Custom vocabulary lists for class and topic work

— FOR TEACHERS AND ORGANIZATIONS

- Separate product data for LanguageTrain
- TrainApps classes, roles, and organization management
- Prepared for classroom groups and school rollout

— PRIVACY-AWARE BY DESIGN

- LanguageTrain uses the TrainApps account, role, and privacy foundation. Product data is stored app-specifically.

Prepared for language classes and school rollout

LEARNER EXPERIENCE

- Dialogue, vocabulary, notes, and progress in one product
- Gentle AI corrections without interrupting practice
- Next practice steps stay reviewable for learners

SCHOOL ADMINISTRATION

- Shared TrainApps accounts, classes, and organization roles
- Product data stays separated for LanguageTrain
- Suitable for pilots, parent information, and internal review
